

The Trivia Vug
October 2009
By RJ Harris

Traces of nitrogen give yellow diamonds their color.

There's no evidence that pirates ever buried their treasure. That myth first came up when captain William Kidd lied about burying his gold during his trial.

The term coprolite refers to the fossilized dung of any creature, not just dinosaurs.

Wilma Flintstone's maiden name is Slaghoople.

Diamonds can be found in 25 countries and on every continent except Antarctica.
